Dear Sir

I have been a member of the FIP for the past several years have been availing of its Loss of License Insurance Policy which it extends to its members through Bajaj Allianz.

Sir as you are aware quite recently on a routine license renewal medical check they found partial blocks to arteries of my heart, for which I had to go through Angio Plasty.

I must admit **I never thought it would happen to me.** I had no idea or symptoms through out my carrier indicating to me that I had a physical problem. I always did my routine treadmill walks and had kept healthy eating habits. The above drew my attention to the fact, that in spite of keeping a strict regime to my habits and lifestyle, it had happened to me. **Well - it can happen to anybody.**

I specially write to thank Capt Puri who personally activated the process and Capt Metha who followed it up for the realization of my monthly claims from Bajaj Allianz to retain my family and myself while I am temporally unfit. I must hasten to add that the FIP staff were extremely helpful through out, and instrumental in expediting the claim hassle free.

Before I end I would strongly recommend all pilots to avail this facility by becoming members of FIP, I assure you, that you will not regret it...I haven't !!

Thanking you

Gratefully Yours

Capt A R Erancee
